Subject Index

Albumins, blood transport of porphyrin drugs by, 235
Aluminum cations, interaction of Gallium and, 245
Amino acids, nickel(II) ions and oxime analogs of, 287
Antiamebic effects study, palladate (II) and N,N′-(octane-1,8-diyl)bis(guanidinium) tetrachloroplatinate (II), 163
Antibiotics
  copper(II) complex containing model compound for cefdinir, 191
  copper(II) complexes of rifampicin, 175
Antidote, mercury poisoning, 207
Antitumor activity
  iron(II) and iron(III) complexes of α(N)-heterocyclic thiosemicarbazones, 267
  platinum–DNA binding and kinetic analysis of the *cis*-DDP–cysteine reaction, 199

Blue oxidases (BOx) ceruloplasmin, copper depletion/repletion of, 167

Cefdinir, copper(II) complex containing model compound for, 191
Ceruloplasmin, copper depletion/repletion of human, 167
Circular dichroism, zinc cytochrome *c*, 219
cis-Diamminedichloroplatinum, metallothionein and, 295
cis-Diamminedichloroplatinum(II)–cysteine reaction, platinum–DNA binding and, 199
Cobalt(II), binding and interaction with nucleosomes, 159
Copper complexes
  tetrakis-μ-2-[(2,6dichlorophenyl) amino] benzene-acetodiaquodicopper(II) dihydrate and, 151
  tetrakis-μ-2-[(2,6dichlorophenyl) amino] benzene-acetodimethylformamidodicopper(II) and, 151
Copper depletion/repletion, ceruloplasmin and, 167
Copper(II) complexes
  copper(II)-β-ODAP complex, 251
  desferrioxamine B and, 281
  metal ion binding with rat pituitary receptor, 277
  model compound for cefdinir and, 191
  photohemolysis and, 263
  rifampicin, 175
  structural and biological aspects of copper(II) complexes with 2-methyl-3-amino-(3*H*)-quinazolin-4-one, 183
Counteranion, copper(II) complexes and, 183
Cytochrome *c*, characterization of zinc-substituted, 219
Cytochrome P450, model compound, 229

Desferrioxamine B, copper(II), nickel(II), zinc(II), and molybdenum(VI) complexes of, 281
DNA, platinum–DNA binding and kinetic analysis of the *cis*-DDP–cysteine reaction, 199

Electron paramagnetic spin trapping studies, copper(II)-β-ODAP complex, 251

Gallium cations, interaction of aluminum and, 245
Gonadotropin-releasing hormone (GnRH) receptor, metal ion binding with, 277

$(HgL_2)_n$(L = 4,6-dimethylpyrimidine-2-thiolate), crystal and molecular structure, 207

Iron
  di-iron oxo-dimers, 229
  iron tetraphenylporphine sulfonate, binding to bovine serum albumin, 235
Iron complexes, iron(II) and iron(III) complexes of α(N)-heterocyclic thiosemicarbazones, 267

L-cysteine, reaction between *cis*-diamminedichloro-platinum(II)-cysteine and, 199

m. Chloroperbenzoic acid, photoprotection of copper(II) complexes and, 263
Mercury poisoning, antidote, 207
Metal complexes, desferrioxamine B and, 281
Metal ion binding
  gonadotropin-releasing hormone (GnRH) receptor and, 277
  thiopurine and thiopyrimidine nucleosides and, 257
  trivalent aluminum and gallium cations interaction with proteins, 245
Metalloproteins, resonance Raman and circular dichroism spectra of zinc cytochrome *c*, 219
Metallothionein, association constant of platinum(II) to, 295
2-Methyl-3-amino-(3*H*)-quinazolin-4-one, copper(II) complexes with, 183
Molybdenum(VI) complexes, desferrioxamine B and, 281
μ-oxo-bis[5,10,20-Tetra(4-chlorophenyl)-porphinato-iron(III)], molecular stereochemistry, 229

Neurotoxic compounds, copper(II)-β-ODAP complex, 251
Nickel(II), binding and interaction with nucleosomes, 159
Nickel(II) complexes, desferrioxamine B and, 281
Nickel(II) ions, oxime analogs of amino acids and peptides and, 287
N,N′-(octane-1,8-diyl)bis(guanidinium) Tetrachloro-platinate (II), synthesis, characterization, and crystal structure, 163
Nucleosides, metal binding to thiopurine and thiopyrimidine, 257

0162-0134/97/$17.00
PII S0162-0134(97)00009-3

Oxime-containing ligand, copper(II) complex structure of, 191
Oxo-dimers, di-iron, 229

Palladate (II), synthesis, characterization, and crystal structure, 163
Peptides, nickel(II) ions and oxime analogs of, 287
Photoprotection, copper(II) complexes and, 263
Platinum–DNA binding, kinetic analysis of the *cis*-DDP–cysteine reaction and, 199
Platinum(II), association constant of platinum(II) to metallothionein, 295
Porphyrins, porphyrin-albumin system, 235

Resonance Raman spectroscopy, zinc cytochrome *c*, 219
Rifampicin, copper(II) complexes of, 175

Sulfur site, metal binding to thiopurine and thiopyrimidine nucleosides and, 257

Tetrakis-μ-2-[(2,6dichlorophenyl) amino] benzeneacetodiaquodicopper(II) dihydrate, synthesis and characterization, 151
Tetrakis-μ-2-[(2,6dichlorophenyl) amino] benzeneacetodimethylformamidodicopper(II), synthesis and characterization, 151
Thiopurine and thiopyrimidine nucleosides, metal binding to, 257
Thiosemicarbazones, iron(II) and iron(III) complexes of α(N)-heterocyclic, 267

Zinc cytochrome *c*, resonance Raman and circular dichroism spectra, 219
Zinc(II), binding and interaction with nucleosomes, 159
Zinc(II) complexes
  desferrioxamine B and, 281
  metal ion binding with rat pituitary receptor, 277
